DESTINATION GRADUATION!

More than 200 teachers across the state, some from as far away as Oxford, attended the PGSD's Tech Camp 4 Teachers, a free professional development workshop available in the summer for the past four years to showcase the wide variety of technology resources available to help teachers enhance the learning experience in their classrooms.

About 33 PGSD students from the middle schools and academies attended Tech Camp 4 Kids, participating in six different technology stations taught by teachers in the district introducing them to different technology resources.
